

# Strategic Plan 2024 – 2028

## Non-State Schools Accreditation Board

The Non-State Schools Accreditation Board was established on 21 September 2001 under the now repealed *Education (Accreditation of Non-State Schools) Act 2001*. From 1 January 2018, the Board continued operation under the *Education (Accreditation of Non-State Schools) Act 2017* (the Accreditation Act).

The Board will respect, protect and promote human rights in its actions and decision-making.

### Vision

Quality education offered in safe school environments within Queensland non-State schools.

### Purpose

The purpose of the Board is to uphold the highest standards of education in non-State schools, maintain public confidence in the operation of non-State schools and foster educational choice in Queensland.

The Board's functions include:

- assessing and settling applications for accreditation of non-State schools,
- determining eligibility for government funding,
- monitoring non-State schools' continued compliance with the prescribed requirements of accreditation,
- monitoring the suitability of governing bodies of accredited schools,
- monitoring compliance with the Accreditation Act, and
- conducting investigations into contraventions of, or noncompliance with, the Accreditation Act.

### Key strategic objectives and government objectives

The Board supports the Government's objectives for the community:

- Good jobs: Good, secure jobs in our traditional and emerging industries
- Better services: Deliver even better services right across Queensland
- Great lifestyle: Protect and enhance our Queensland lifestyle as we grow

The Board's key strategic objectives relate to the sub-objective of 'Backing our frontline services', in respect of the delivery of world-class frontline services in education:

- Best practice regulation supporting the delivery of consistent, high-quality education and safe school environments
- Informed and capable non-State schooling sector able to effectively manage compliance
- Consistent and robust decision-making protecting the quality and reputation of the sector

### Key strategic risks

- Demands placed on the Board negatively impact on its ability to effectively regulate
- Disproportionate regulatory burden imposed on quality non-state schools
- Non-state schools not complying with the requirements for accreditation
- Non-compliance not evident in a timely manner or responses to non-compliance not timely, consistent or appropriate
- Being unaware that government funding was fraudulently claimed or dispensed

### Key opportunities

- Working closely with the Queensland Department of Education to implement the Queensland Government's response to the independent review of the non-state schools accreditation framework, which was publicly released in early 2024 and which includes recommendations related to the operations of the Board.
- Adapting to emerging technologies and impacts on security and confidentiality of personal information
- Designing effective technological and operational solutions to enhance Board efficiency
- Developing solutions to a workload that is ever increasing in volume and complexity for the Board and its Secretariat and including external review of decision making by the Queensland Civil and Administrative Tribunal
- Monitoring compliance in a legislative environment subject to change
- Managing the performance of statutory functions and duties in the COVID-19 recovery period following the cessation of the temporary Queensland public health COVID-19 emergency legislation
